Harlingen, TX 78550 | drakeeverett@gmail.com | (956) 577-3404 | www.linkedin.com/in/drake-everett

Entry-Level IT, System Administration, Software Development , & Cybersecurity

SUMMARY

Highly dedicated Computer Science Honors Graduate of Lamar University & Texas State Technical College. Equipped with a Bachelor's of Science and Associate of Science in Computer Science, respectively. Experienced in hardware & software support & troubleshooting, network fundamentals, active directory configuration, access management, software & web development, information & cyber security best practices, and customer servicing. Currently working on CompTIA A+ Certification, then will be moving on to Network+ and Security+ while building relevant projects, and will ultimately be enrolling in a Masters program in Cybersecurity. Seeking role in entry-level Information Technology, security, or system administration.

KEY SKILLS

PC Hardware Support & Troubleshooting • Software Troubleshooting • OS' (Windows, Mac, Linux) • Active Directory Configurations • Network Support & Configuration • VMware Virtualization • Remote & In-person Client Support • Software Engineering • Web Development • System Monitoring • Documentation • BIOS/UEFI Configurations • Java, C++, & Python Experience • Databases • Ticketing Systems • Remote Desktops • Small Electronics Repair • Inventory & Asset Tracking • Cybersecurity Procedures & Best Practices • Agile Development & Processes (Jira) • CompTIA A+ Certified • Professional Communication • Ethical & Reliable • Leadership • 100+ WPM Type Speed

CERTIFICATIONS

- CompTIA A+ | Expires 09/03/2029
- CompTIA Network+ (In Progress)

EDUCATION

Bachelor of Science in Computer Science - March 2026

Lamar University — Remote | CGPA: 3.565/4.0 | Cum Laude

- **Relevant Coursework:** Network System Administration, Cybersecurity Systems, Cybersecurity Networks, Computer Networks, Operating Systems, Cloud Computing, Database Design, Computer Architecture, Distributed Systems, Algorithms Design and Analysis

Associate of Science in Computer Science - August 2022

Texas State Technical College — Remote | CGPA: 3.242/4.0

- **Relevant Coursework:** Programming Fundamentals I, II, & III, College Physics I & II, Computer Organization, Calculus I

High School Diploma - May 2021

Harlingen High School South - Hybrid in Harlingen, TX | CGPA: 4.4/5.0

- **Relevant Coursework:** AP Computer Science A (Passed AP test w/ 3.0/5.0), AP Computer Science Principles (Passed AP test w/ 5.0/5.0), Pre-Calculus, College Algebra
- **Awards:** Top 10%, TABC Academic All State, UIL Scholar Award, Harlingen South Basketball Scholarship Award, RGV East All Star, Mr. Offense Award, Mark Henz Award, named a Captain.

WORK EXPERIENCE

Texas State Technical College — Hybrid in Harlingen, TX - July 2022 – Present

Career Advisor

- Guided students through the transition from TSTC coursework to industry employment via resume appointments, job search coaching, mock interviews, LinkedIn optimization, professional headshots, and employer table events, helping hundreds of students secure high-paying roles in their fields.
- Served as Project Manager for the Interview Practicum across 7 semesters, expanding the event from 2 to 3 days and growing attendance by over 50%.
- Identified inefficiencies in the department's existing file-sharing system and proposed a replacement; built and maintained a shared drive for both the statewide team and local Harlingen campus, centralizing working documents and repositories to streamline recordkeeping and accelerate new hire onboarding.
- Tracked student engagement and appointment outcomes across HireTSTC (GradLeaders), Element 451, Workday, and Industry Connect (Simplicity), maintaining detailed notes in student profiles to support continuity of service.
- Conducted ongoing research on job search, resume writing, and interviewing best practices to keep advising strategies current with hiring trends.
- Increased known graduate placement rate from 82.5% to 94.8% year-over-year (Fall 2025–Fall 2026) through improved tracking and follow-up processes.

Texas State Technical College — Hybrid in Harlingen, TX - January 2022 – July 2022

Career Services Staff Assistant

- Provided front-desk technical support, helping students navigate online scheduling systems and troubleshoot access issues with appointment portals.
- Promoted to Career Advisor after completing an Associate of Science in Computer Science, based on demonstrated reliability and readiness for expanded technical and administrative responsibilities.

TECHNICAL PROJECTS

- **PC & Laptop Hardware Servicing** — Built, upgraded, and repaired custom desktop and laptop systems over 10+ years, installing and replacing motherboards, CPUs, GPUs, RAM, storage devices, power supplies, and cooling systems, plus laptop-specific work including battery replacement, RAM upgrades, and OS installation. Configured UEFI/BIOS settings including Secure Boot, memory profiles (XMP/EXPO), fan curves, and undervolting. Used diagnostic and monitoring tools including CPU-Z, Core Temp, MSI Afterburner, AMD Adrenalin, and NVIDIA GeForce NOW to stress test and troubleshoot hardware, driver, and thermal issues. Followed ESD safety best practices, including anti-static wrist straps, throughout all builds and repairs.
- **Windows & Linux Active Directory** — Created and managed user accounts and permissions in Active Directory; explored Linux file system structures and directory hierarchies (e.g., /etc/shadow) to understand user authentication and access control mechanisms.
- **Web Application Security Labs** — Demonstrated SQL injection and Cross-Site Request Forgery attacks in controlled lab environments, including authentication bypass, database manipulation, and forged GET and POST requests. Implemented and evaluated mitigations including prepared statements, anti-CSRF tokens, and SameSite cookie protections.
- **Linux Network Security Labs** — Configured UFW firewall rules, developed a basic Netfilter kernel-module firewall, and examined ingress and egress filtering. Demonstrated how SSH and VPN tunnels, TUN interfaces, routing, and NAT can be used to route traffic around firewall restrictions.
- **Personal Website Development** — Designed and developed responsive websites using HTML, CSS, JavaScript, Bootstrap, and GitHub Pages. Built interactive features including timers and measurement conversion utilities while applying responsive web design principles.
- **Pomodoro Desktop Application** — Developed a desktop Pomodoro timer application to improve personal productivity and study efficiency. Applied software development fundamentals including application logic and user interface implementation.
- **Batocera Linux Handheld Upgrade** — Installed and configured Batocera Linux on an Anbernic 35XXH handheld gaming device. Performed operating system flashing, configuration, and troubleshooting to improve performance and user experience.
- **Linux System Deployment** — Repurposed a 2012 MacBook by replacing the hard drive with an SSD and deploying Linux Mint to improve responsiveness and extend the device's usable lifespan. Configured drivers, storage, and operating system settings while troubleshooting installation and compatibility issues.
